

# Making Presentation Buttons

Create a Presentation Button using Edit | Action Buttons | Presentation.

©2009 Key Curriculum Press

Suppose you've created three action buttons.

You press the first...

and the caption appears.

You press the second...

AC rotates by 90°.

and the radius rotates.

You press the third...

and the caption is hidden.

But what if you want all three buttons to work automatically?

Select all three buttons in order...

and choose Edit | Action Buttons | Presentation.

Choose **Sequentially** to make the buttons work one after the other.

Click OK...

and the new button appears.

Press the button to present all three actions.

## More Tips

You can insert a time delay between the different actions in a sequence.

You can choose **Simultaneously** in Presentation Properties to make the action buttons work all at the same time.
